

## CONTENTS

	PAGE
<b>1 SMALL HYDRO POWER</b>	<b>7</b>
1.1 INTRODUCTION	7
1.1.1 The concept	7
1.1.2 Planning small hydro projects	7
1.2 THE WATER RESOURCE AND ITS POTENTIAL	8
1.2.1 Hydrology	8
1.2.2 Sizing a power plant	8
1.2.3 Annual energy production	9
1.2.4 Site selection and basic layout	9
1.3 CIVIL ENGINEERING WORKS	10
1.3.1 Dams and weirs	10
1.3.2 Intakes	10
1.3.3 Canals	11
1.3.4 Penstocks	11
1.3.5 Tailraces	12
1.4 ELECTROMECHANICAL EQUIPMENT	12
1.4.1 Hydraulic turbines	12
1.4.2 Gearboxes and other speed increasers	14
1.4.3 Generators	15
1.4.4 Control equipment	15
1.4.5 Switchgear panel and protection equipment	15
1.4.6 Automatic control	15
1.4.7 Power station auxiliary electrical equipment	16
1.5 SMALL HYDRO POWER ISSUES OF CONCERN	16
1.5.1 Environmental impact	16
1.5.2 Economics of SHP	16
1.5.3 Barriers to the development of SHP	17
<b>2 WIND ENERGY</b>	<b>17</b>
2.1 THE POWER OF THE WIND	17
2.1.1 Formation of winds	17
2.1.2 Wind power density	17
2.1.3 Variability of winds	18
2.1.3.1 <i>Variation with time</i>	18
2.1.3.2 <i>Wind speed dependence on height</i>	19
2.1.3.3 <i>Spatial variations</i>	20
2.1.4 Global wind power resource	20
2.1.5 Historical perspective and current development of wind energy	20
2.2 DESCRIPTION OF WIND TURBINES	21
2.2.1 Background	21
2.2.2 Rotor	21
2.2.3 Nacelle	22
2.2.3.1 <i>Main shaft</i>	22
2.2.3.2 <i>Disc brake</i>	22
2.2.3.3 <i>Transmission</i>	22
2.2.3.4 <i>Generator</i>	22
2.2.3.5 <i>Yaw assembly</i>	23
2.2.4 Tower	23
2.2.4.1 <i>Fixed tubular towers</i>	23
2.2.4.2 <i>Fixed latticed towers</i>	23
2.2.4.3 <i>Erectable-guyed towers</i>	23
2.2.5 Power control	24
2.2.6 Rotor speed	24
2.3 WIND PERFORMANCE CHARACTERISTICS	24
2.3.1 Range of wind turbine applications	24
2.3.1.1 <i>Application classes</i>	24
2.3.1.2 <i>Wind-farms</i>	24
2.3.1.3 <i>Distributed generation</i>	25
2.3.1.4 <i>Hybrid power systems</i>	25
2.3.2 Wind system energy productivity	25
2.3.2.1 <i>Overview</i>	25
2.3.2.2 <i>Estimates of the annual energy production</i>	26
2.3.2.3 <i>Capacity factor as a measure of energy production</i>	26
2.3.3 Wind system reliability	27
2.3.3.1 <i>Impact of design and manufacturing advances</i>	27
2.3.3.2 <i>Availability</i>	27
2.3.3.3 <i>Cost benefits</i>	27
2.3.4 Power supply characteristics	28
2.3.4.1 <i>Correlation with the load</i>	28

2.3.4.2	<i>Output of a single wind turbine and a wind-farm</i>	28
2.3.4.3	<i>Power quality</i>	29
<b>3</b>	<b>PHOTOVOLTAICS</b>	29
3.1	INTRODUCTION	29
3.1.1	Background	29
3.1.2	Solar energy	29
3.2	SOLAR CELLS	30
3.2.1	History of solar cells development	30
3.2.2	Method of production of solar cells	30
3.2.3	Operation of solar cells	31
3.3	PV MODULES (ARRAY)	32
3.3.1	PV array components	33
3.3.1.1	<i>The cell</i>	33
3.3.1.2	<i>String</i>	33
3.3.1.3	<i>Module</i>	33
3.3.1.4	<i>Encapsulation</i>	33
3.3.1.5	<i>Diodes</i>	34
3.3.1.6	<i>Stands/tracking</i>	34
3.3.2	PV array operation	34
3.3.2.1	<i>Series</i>	34
3.3.2.2	<i>Parallel</i>	34
3.3.2.3	<i>Diodes</i>	35
3.3.2.4	<i>Tracking</i>	35
3.4	PV SYSTEMS AND APPLICATIONS	36
3.4.1	PV markets	36
3.4.2	Stand-alone systems	37
3.4.2.1	<i>Components and maintenance</i>	37
3.4.2.2	<i>Costs and economics</i>	37
3.4.2.3	<i>PV-hybrid systems</i>	38
3.4.3	Grid-connected systems	38
3.5	PHOTOVOLTAICS ISSUES OF CONCERN	39
3.5.1	Economics of photovoltaics	39
3.5.2	Environmental considerations	39
<b>4</b>	<b>CONCENTRATING SOLAR POWER</b>	40
4.1	INTRODUCTION	40
4.2	OVERVIEW OF POWER SYSTEMS TECHNOLOGIES	40
4.2.1	Parabolic trough systems	40
4.2.1.1	<i>Current status of trough technology</i>	40
4.2.1.2	<i>Opportunities for cost reduction</i>	41
4.2.1.3	<i>Current international opportunities</i>	42
4.2.2	Power tower systems	42
4.2.2.1	<i>Current status of power tower systems technology</i>	42
4.2.2.2	<i>Opportunities for cost reduction</i>	44
4.2.2.3	<i>Current projects</i>	44
4.2.3	Dish/engine power plants	45
4.2.3.1	<i>Current status of dish systems technology</i>	45
4.2.3.2	<i>Opportunities for cost reduction</i>	45
4.2.3.3	<i>Current projects</i>	46
4.3	ENVIRONMENTAL IMPACTS	47
4.3.1	Environmental impacts	47
4.3.2	Water and land requirements	47
4.4	THE MARKETS	47
4.4.1	General	47
4.4.2	Dispatchable power markets	48
4.4.3	Distributed power markets	48
4.5	CASE STUDY	48
<b>5</b>	<b>GEOHERMAL ENERGY</b>	49
5.1	GEOHERMAL ENERGY CHARACTERISTICS	49
5.1.1	Geothermics basics	49
5.1.2	Geothermal resources	50
5.1.2.1	<i>Hydrothermal</i>	50
5.1.2.2	<i>Geo-pressured</i>	50
5.1.2.3	<i>Hot dry rock</i>	50
5.1.2.4	<i>Magma</i>	50
5.1.3	Geothermal potential	51
5.1.4	Geothermal energy utilisation	51
5.1.4.1	<i>Power generation</i>	51
5.1.4.2	<i>Direct use</i>	52
5.2	ELECTRICITY PRODUCTION METHODS	52

5.2.1	Fundamentals	52
5.2.2	Dry steam process	52
5.2.3	Steam flash process	53
5.2.4	Binary process	53
5.2.5	Combined or hybrid plants	53
5.2.6	Power-plant performance	54
5.2.7	Geothermal small and mini-grid power generation	54
5.2.8	Geothermal grid-based power generation	55
5.3	<b>GEOHERMAL POWER PROJECT DEVELOPMENT PROCESS</b>	55
5.3.1	Reconnaissance and exploration	56
5.3.1.1	<i>Studies and techniques</i>	56
5.3.1.2	<i>Infrastructure</i>	56
5.3.2	Exploration drilling	56
5.3.3	Feasibility study	56
5.3.3.1	<i>Economics of geothermal power</i>	57
5.3.4	Development	57
5.3.4.1	<i>Production drilling</i>	57
5.3.4.2	<i>Design of pipelines, steam collection systems and power station</i>	58
5.3.4.3	<i>Construction and commissioning</i>	58
5.4	<b>ADVANTAGES AND PROBLEMS OF GEOHERMAL POWER</b>	58
5.4.1	Worldwide distribution of geothermal utilisation	58
5.4.2	Competitiveness of geothermal energy	59
5.4.3	Production and pollution problems	60
5.4.3.1	<i>Mineral deposition</i>	60
5.4.3.2	<i>Hydrological changes</i>	60
5.4.3.3	<i>Corrosion</i>	60
5.4.3.4	<i>Pollution</i>	60
5.4.3.5	<i>Pollutants in geothermal steam</i>	60
5.4.3.6	<i>Geothermal waters</i>	61
5.4.3.7	<i>Re-injection</i>	61
5.4.4	The future for geothermal energy	61
<b>6</b>	<b>BIOMASS POWER</b>	61
6.1	<b>BIOMASS AS A RESOURCE</b>	61
6.1.1	Terminology	61
6.1.2	Biomass energy cycle	62
6.1.3	Biomass electricity (bio-power)	63
6.2	<b>BIOMASS FEEDSTOCKS</b>	63
6.2.1	Wood residues	64
6.2.1.1	<i>Mill residues</i>	64
6.2.1.2	<i>Urban wood residues</i>	64
6.2.1.3	<i>Tree trimmings</i>	64
6.2.1.4	<i>Forest residues</i>	64
6.2.2	Agricultural residues	64
6.2.2.1	<i>Bagasse</i>	64
6.2.2.2	<i>Rice husks</i>	64
6.2.2.3	<i>Straw</i>	65
6.2.3	Energy crops	65
6.2.4	Wastes	65
6.2.4.1	<i>Industrial waste</i>	65
6.2.4.2	<i>Municipal solid waste (MSW)</i>	65
6.2.4.3	<i>Animal waste</i>	65
6.2.4.4	<i>Sewage</i>	65
6.3	<b>POWER PRODUCTION TECHNOLOGY</b>	66
6.3.1	Biomass conversion technologies	66
6.3.2	Direct combustion (direct fired plants)	66
6.3.2.1	<i>Fixed bed combustion</i>	66
6.3.2.2	<i>Fluidised bed combustion</i>	67
6.3.2.3	<i>Suspension burners</i>	67
6.3.3	Cofiring with coal	68
6.3.3.1	<i>Description</i>	68
6.3.3.2	<i>Modifications and the related costs</i>	68
6.3.4	Gasification-based biomass power production	69
6.3.4.1	<i>System description</i>	69
6.3.4.2	<i>Power cycle options</i>	70
6.4	<b>BIOPOWER MARKET POTENTIAL AND IMPACTS</b>	71
6.4.1	Market position and potential	71
6.4.2	Environmental impacts	72
6.4.2.1	<i>Air quality</i>	72
6.4.2.2	<i>Water quality</i>	72
6.4.2.3	<i>Land use</i>	72

6.4.3	Economic impacts	72
6.4.4	Barriers to entry	73
<b>7</b>	<b>ENABLING TECHNOLOGIES</b>	<b>73</b>
7.1	INTRODUCTION	73
7.2	ENERGY STORAGE TECHNOLOGIES	74
7.2.1	Introduction	74
7.2.2	Battery technology	74
7.2.2.1	Lead acid batteries	74
7.2.2.2	Alcaline batteries	75
7.2.2.3	Advanced batteries	75
7.2.2.4	Comparison of battery types	75
7.2.2.5	Battery sizing	75
7.2.3	Pumped hydro	76
7.2.4	Compressed air energy storage (CAES)	76
7.2.5	Flywheels	76
7.2.6	Superconducting magnetic energy storage	76
7.2.7	Advanced electrochemical capacitors	77
7.3	BATTERY CHARGE CONTROLLERS (REGULATORS)	77
7.3.1	The concept	78
7.3.2	Overcharge protection	78
7.3.3	Deep discharge protection	78
7.3.4	Protection against external influences	79
7.3.5	Main types of charge controllers	79
7.4	INVERTERS FOR GRID-CONNECTED SYSTEMS	80
7.4.1	Necessity	80
7.4.1.1	Fundamental characteristics of grid-connected inverters	80
7.4.1.2	Requirements on grid-connected inverters	80
7.4.2	Types of grid-connected inverters	81
7.4.2.1	Grid-commutated inverters	81
7.4.2.2	Self-commutated inverters with pulse-width modulation and a 50 Hz transformer	81
7.4.2.3	Self-commutated inverters with pulse-width modulation and an HF transformer	81
7.5	SYSTEM CONTROLLERS	82
7.5.1	Controllers for stand-alone wind-diesel applications	82
7.5.2	High penetration AC bus wind-diesel systems	83
7.5.3	DC bus systems	83
<b>8</b>	<b>RES INTEGRATION</b>	<b>83</b>
8.1	INTRODUCTION	83
8.2	RE TECHNOLOGIES IN EUROPE	84
8.2.1	Present situation	84
8.2.2	RES strategies	85
8.2.3	The electricity market	85
8.2.4	Integrated RE projects	85
8.3	INTEGRATION ISSUES	86
8.3.1	Electricity production with RES	86
8.3.1.1	The intermittent character of some RES	86
8.3.1.2	Problems associated with the power demand security and dynamic performance of hybrid systems	86
8.3.1.3	Energy and load management	87
8.3.1.4	Energy storage options	87
8.3.2	Classification of integrated RE systems	87
8.3.2.1	Single consumers and small groups	87
8.3.2.2	Stand-alone and isolated grids	87
8.3.2.3	Local energy supply	88
8.3.2.4	Regional energy supply	88
8.3.3	Transmission and distribution system	88
8.3.3.1	Interface issues	88
8.3.3.2	Operational issues	89
8.3.4	Levels of integration	90
8.4	ECONOMICS OF RENEWABLE ENERGY SYSTEMS	91
8.4.1	Costs and prices	91
8.4.2	Factors affecting the costs of Renewables	91
8.4.2.1	Transmission issues for RE technologies	92
8.4.2.2	Distributed generation	92
8.4.2.3	Reactive power charges	92
8.4.2.4	Capacity credit	93
8.4.3	Taking into account environmental externalities	93
8.4.4	Supporting Renewables	93
